Q: I live in a mid size apartment block. We have lockers in the basement behind a locked door in our parking garage. Our Strata has recently put our apartment numbers beside the locker number. I feel this makes it easier for thieves to 'target' residences. What is the 'Crime free Multi-Housing' stance on this?

A: Although the Crime Free Multi-Housing Program does not take an official position on this issue, we would encourage strata councils to mark lockers with a different number than that of the apartment or unit owner.
